

Name: _____

Analyzing Food Webs

Complete the following tasks based on your knowledge of biology and on the food web

1. Select and record the name of one species in the food web, and explain how its removal could affect one of the other species in the food web.

2. Identify one process that a producer can accomplish that an herbivore cannot accomplish.

3. Identify a carnivore from the food web and describe the steps of how the energy from the sun gets to that carnivore.
